(04) Read the passage and answer the questions. (15 marks)

Most small businesses depend on part-time employees, largely because they cost less in wages and benefits than most full-time employees and still provide talent and flexibility. The current economic situation may make part-time employees more valuable than ever; but at the same they present unique challenges to managers.

Some part-time employees are as dedicated as their full-time colleagues, while others simply show up to work and have little sense of commitment. Both types require special attention.

Consider part-time employees when making changes that affect people both inside and outside the workplace. Keeping the part-time schedule close at hand where it is visible daily can prevent part-time employees from being overlooked. Also be sure to include them in developing departmental goals and to send them a copy of memos and e-mails.

Opportunities for substantive feedback could also be expanded. For example, if part-time employees are not included in formal performance evaluations at least once a year, making the practice more inclusive could make them feel more like they are a part of the workplace and that their performance matters.
Part-time employees can also be included in professional development activities, including benefits such as support for college classes or attendance at relevant workshops. More inexpensive and creative options are available as well, such as holding in-house workshops and sessions to focus on professional and personal interests.

(From: The Sunday Times, 2nd November 2008)

Questions:
